

Moths To A Flame

Make a moth – template sheet

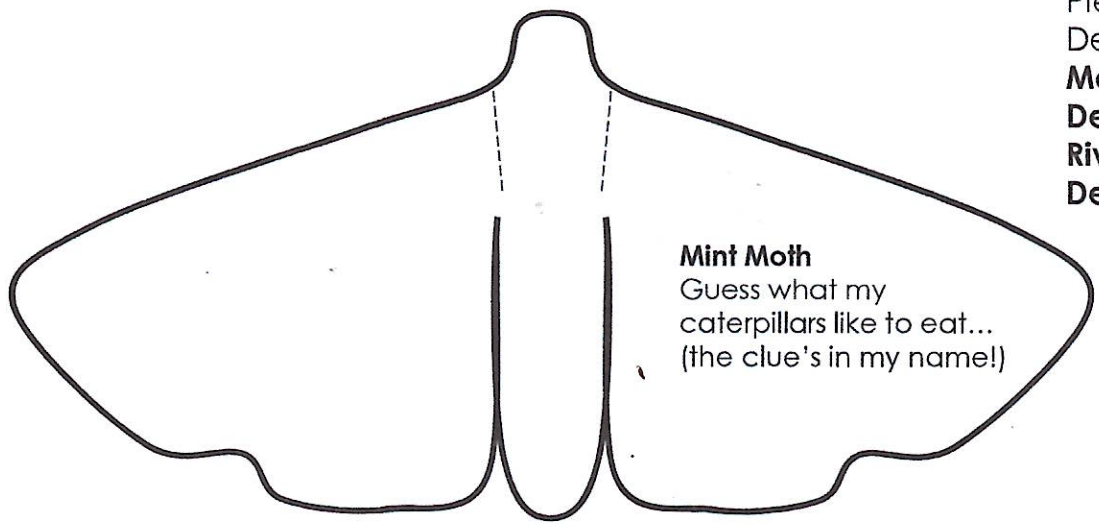

Transform a plastic milk bottle into moths, then send them to us. We will create an installation of moths at The Devon Guild of Craftsmen this summer, then in November our moths will join together with other communities from across the UK and further afield to create a beautiful thought-provoking mass-participation UV illuminated art-installation heading to Glasgow for the UN Climate Conference, COP26.

Lime Hawk Moth
The wiggly bottoms on my wings help me to hide in the leaves

For more info and an instruction video visit www.mothsto aflame.art and click on 'Make a moth'

Please either deliver your moths to the Devon Guild of Craftsmen, or post them to:
**Moths to a Flame,
Devon Guild of Craftsmen,
Riverside Mill, Bovey Tracey,
Devon, TQ13 9AF**

Mint Moth
Guess what my caterpillars like to eat...
(the clue's in my name!)

Warning!
Marker pens are permanent
and will stain clothes & skin

Join the **#MothsToAFlame** project to send your whisper of hope to world leaders at COP26.

Blood-Vein

Twist my wings slightly to make my upper wings overlap my lower wings. I have feathery antennal!

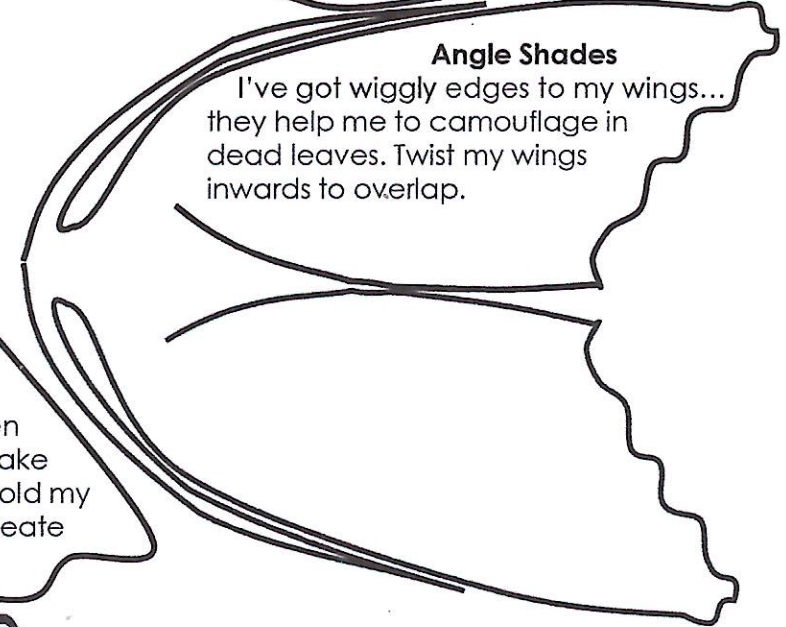

Yellow Underwing

Twist my wings in so that my upper wings almost cover my underwings.

Black Arches

Use your scissors to carefully snip my antenna, then gently twist to make them feathery. Fold my wings back to create my body.

Angle Shades

I've got wiggly edges to my wings... they help me to camouflage in dead leaves. Twist my wings inwards to overlap.

1. Clean your plastic milk bottle well. Leave to dry.
2. Cut a piece of plastic slightly larger than your chosen moth template.
3. Place the plastic over the moth shape. Trace lines using a marker pen.
4. Use scissors to cut around the lines.
5. Fold the wings, curl / twist / fold the antenna.
6. Decorate using marker pens (UV and normal permanent).
7. Use needle and thread to hang your moth (optional)
8. Send us your moths to add to the installation heading to COP26.

Warning!
Marker pens are permanent and will stain clothes & skin
